Professional Summary

Frontend-Focused Full-Stack Web Developer with experience designing and building scalable web applications using React, Next.js, Node.js, PHP, MongoDB, and MySQL. Experienced in product research, UI/UX design, system architecture planning, REST APIs, authentication systems, and responsive web development. Delivered client projects and collaborated in Scrum-based environments while building solutions from research and wireframing through deployment. Currently strengthening software engineering fundamentals through Data Structures & Algorithms and modern full-stack development practices.

Technical Skills

- **Frontend:** React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Redux
- **Backend:** Node.js, Express.js, PHP, Socket.IO
- **Database:** MongoDB, MySQL, PostgreSQL
- **Product & Design:** Figma, Wireframing, User Flows, Responsive Design, UI/UX Design, Product Research
- **Tools & Platforms:** Git, GitHub, Vercel, Render, InfinityFree, Notion, Draw.io
- **Core Skills:** Full-Stack Development, REST APIs, JWT Authentication, CRUD Systems, Component Architecture, Responsive Design, System Design Planning

Professional Experience

Full-Stack Web Developer (Contract)

Raiyan Engineering BD | April 2026 - May 2026

[View Project GitHub Link](#)

- Designed, developed, and deployed a full-stack engineering services platform using Next.js and MongoDB.
- Built dynamic content-driven sections using reusable React components.
- Implemented responsive layouts and mobile-first user experiences.
- Structured scalable frontend architecture for future content expansion.
- Delivered a production-ready website for a real client engagement.

Technologies: Next.js, React, MongoDB, JavaScript, Git

MERN Stack Developer Intern

Rise Together | WorkShelf | Dec 2025 – Jan 2026

[View Documentary](#)

- Participated in planning and architecture discussions for a scalable MERN-based e-commerce platform.

- Conducted competitive analysis of Amazon Business and Barnes & Noble to identify business requirements and user experience opportunities.
- Designed user flows, feature documentation, and system requirements for customer and admin modules.
- Created wireframes and responsive UI designs for shopping, checkout, and dashboard experiences.
- Collaborated using Scrum methodology, Notion, and Draw.io for project planning and documentation.

Technologies: Figma, Notion, Draw.io, MERN Architecture Planning, Product Design

Projects

Student Resource System

Full-Stack University Management Platform

Tech Stack: PHP, MySQL, JavaScript, Socket.IO, HTML, CSS

[Visit Website](#) [GitHub Link](#)

- Developed a multi-role platform supporting Student, Teacher, and Admin accounts.
- Implemented authentication and role-based access control.
- Built CRUD systems for resource and user management.
- Added real-time communication features using Socket.IO.
- Designed responsive interfaces for desktop and mobile devices.

MOZITO25

Interactive Gaming Platform

Tech Stack: React.js, JavaScript, Git, Responsive Design

[Visit Website](#) [GitHub Link](#)

- Developed browser-based games including Snake and Tic-Tac-Toe.
- Created reusable component architecture for maintainable frontend development.
- Implemented responsive design for desktop and mobile users.
- Optimized rendering and user interaction flows.

Education

- **B.Sc. in Computer & Communication Engineering**
International Islamic University Chittagong | 2024 – Present
